

# Pierre, SD – Highlands Ridge Apartments

## New Construction

### Project Summary:

FFS provided WalStone panels on this new multi-family apartment in Pierre, SD. The **WalStone** color selected was Cibola Gold with Dark Bronze Aluminum accent T-flashing. Along with the WalStone product, FFS BrickWal was used also.

**BrickWal** product is Endicott thin brick in Medium 46 Smooth. This aesthetically pleasing three story market rate apartment building includes 57 dwelling units.

### Meet or Exceeding Owners Goals, Values and/or Expectations:

Midwest Construction was interested in an exterior finish that had a distinctive flair of natural stone finish along with low maintenance. Walstone is weather resistant and was factory installed at the Fullerton Building Systems facility along with the FFS BrickWal product. With the construction of this multi-unit building in a South Dakota winter, Midwest Construction was happy to have the exterior finishes in place during the install. This alleviated the high cost of tenting and heating during the install process.

### FFS PRODUCTS USED:

WalStone  
BrickWal

### CLIENT:

Midwest Construction

### ARCHITECT:

Ciavarella Design - Mitchell, SD
