

## Albert Lea, MN – Hy-Vee Gas Convenience Store

### Scrape and ReBuild

#### Project Summary:

FFS provided BrickWal panels to FBS on this new building package for Hy-Vee Construction. Hy-Vee Construction is a repeat business client with a long list of projects where FFS has been a key supplier of exterior veneer finishes. This particular project was a multi-tenant build incorporating a Hy-Vee convenience store and a Caribou Coffee. The selected **BrickWal** finish was a mixture of Endicott Red Blend, Medium Ironspot # 77 and Ivory Velour modular thin brick.

#### Meet or Exceeding Owners Goals, Values and/or Expectations:

The utilization of FBS allows HyVee Convenience/Gas stores to maintain consistent expectations regardless of the region they choose to develop. The FBS installation crew achieved the 3 day set goal. With the exterior finishes installed at the FBS manufacturing facility, HyVee eliminated the high cost of setting brick on-site.
