

Lafayette, LA Sonic Image Modernization

Project Summary:

FFS provided this renovation building package for the Sonic Restaurant in Lafayette, LA. FFS worked with Dream Weaver Construction, LLC. This renovation, FFS supplied the **StoneWal** panels in Boral Stone, Southwest Blend and **EnduraWal** Panels were done in worm trail texture, Buckskin.

Meet or Exceeding Owners Goals, Values and/or Expectations:

As you can see by the before/after pictures this was a dramatic renovation. The general contractor liked the ease and speed of working with the FFS exterior finish panels instead of each individual piece of material. StoneWal gives you the look of traditional masonry without the hassle of expensive lintels, heavy foundations and structural supports because it only weights 12 lbs per sq/ft. EnduraWal™ is designed with a base coat, fiberglass mesh and strong polymer finish, ensuring you a great look that won't break, shift or crack.

FFS PRODUCTS USED:

EnduraWal
StoneWal
